Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

Excerpt: .appear, though the statement requires substantiation, that at present an excessive amount of time is devoted in grammar schools to relatively simple arithmetical operations, and that the purposes of thorough drill are defeated through excessive iteration. Arithmetic has changed from a hard subject into a tiresome one. Accuracy, the universal demand of employers and others, can be inculcated to some extent by continued drill and repetition. But it is also functioned by discipline, and it may well be questioned whether the decreased content, with consequent repetitions, of grammar school arithmetic has not come about as a result of the relaxed intellectual discipline which follows naturally from the application of development methods in primary education. The junior high-school course of two or three years, so arranged as to include the customary first year of algebra, will meet this situation, provided some method is devised by grammar-school authorities for improvement in accuracy in the first six grades. If this is well done, the seventh, eighth, and ninth years should be devoted to generalized mathematics, and should include the principles of arithmetic, symbolic form of expression, informal geometry, elementary equations and problems, and a wide field of applications. The junior high-school mathematical course should be a unit in itself. Probably it will not be practicable to crowd into it matter which is now given in the last three years of the high-school course. It offers no place for Euclidean method. Theorems and corollaries should be taboo. Much that...
